## **CLASSIC WAX** ~ Toluene Free, Toluene Safe (PLEASE SEE SEPARATE BROCHURE)

### **NATURAL CREAMY BEESWAX**

Made to a traditional recipe using refined beeswax and oils. Our Natural Creamy Beeswax polish cleans, revives and enriches the natural patina on all wooden furniture creating a deep, rich sheen.

Natural Creamy Beeswax is available in both clear and dark brown. It is especially suitable for period oak & mahogany. The Dark may be used to impart a deeper color to light furniture.

Apply with a soft cloth, working along the grain, and polish off immediately. Best results are obtained by applying wax to small areas at a time.

Natural Creamy Beeswax both cleans and polishes furniture to a deep lustrous shine leaving the furniture with a pure, clean smell.

Creamy Beeswax is safe & easy to use! (Available in 250ml)

### **CLASSIC LIMING WAX**

A smooth white paste wax which produces a white grained look on wood. Particularly effective on Oak and other open grained woods. Apply directly onto wood, working the wax well into the grain. Allow to go tacky then buff with a soft cloth to achieve a gloss finish.

(Available in 250 ml and 2.5 L)

### **CLASSIC TERRACOTTA WAX**

A beautiful treatment for glazed & unglazed tiles that imparts an Old World look of well burnished luxuriousness with a minimum amount of work. For durability and shine, unglazed tiles (Terracotta) should first be sealed with boiled linseed oil or other Manufacturer's recommended sealer. Apply wax with a cloth or brush, working well into the tiles. Leave for 3-4 minutes and polish with a cloth or buffing machine. Additional applications will enhance the true color of the tiles and give a more desirable finish.

(Available in 450ml and .9 US Gallon)
